

DIY Project Making

Organised by Science Club

Date: 01/08/2023

Venue: Top floor corridor from Class 6th A – 6th F

Judges: Ms. Garima Jain and Ms. Amita Rawat

Periods: 2 - 4

CLASS: VI

PROJECT MAKING

The DIY Project Making competition was designed to engage 6th-grade students in a creative and hands-on learning experience. In this activity, students had the opportunity to use their imagination and problem-solving skills to create models on a topic of their choice. This project encouraged critical thinking, planning, and craftsmanship.

OUTCOME OF THE ACTIVITY

The outcomes of the DIY Model Making project for 6th-grade students are multifaceted and encompass various aspects of their learning and development. Here are the key outcomes of this activity:

Enhanced Creativity: Students will have the opportunity to unleash their creativity by choosing a topic and designing their models. They will explore different ways to represent their chosen subject, fostering creative thinking and problem-solving skills.

Improved Research Skills: This project encourages students to conduct research on their chosen topics, gathering information to accurately represent their models. They will learn how to find reliable sources, extract relevant information, and synthesize it into their projects.

Hands-On Learning: Through the construction of their models, students engage in hands-on learning. They learn about materials, measurements, and craftsmanship, gaining practical skills that are valuable beyond this project.

Effective Communication: During the presentation phase, students practice their communication skills by explaining their models to their peers. This helps them become more confident speakers and better at conveying complex ideas clearly.

Experiential Learning: The project provides a real-world context for learning. Students can see how the knowledge they acquire in the classroom can be applied in a practical, meaningful way.
